CALL FOR PAPERS

4th International Workshop on Networks of Cooperating Objects for Smart Cities 2013
(CONET/UBICTEC 2013)
jointly held with CPSWeek 2013
http://www.cooperating-objects.eu/events/
http://conet2013.deis.unical.it
Philadelphia, PA, USA
April 8, 2013

There are three important concepts that have gained relevance over the past years. First, the concept of classic embedded systems where the focus is on the control of physical processes (machinery, automobiles, planes, etc.). Second, the notion of pervasive computing (or ubiquitous computing) which foresees everyday objects having some form of computation capacity and, in most cases, sensing and communication facilities. Third, wireless sensor networks where small computing devices are able to sense their environment and cooperate in order to achieve a common goal. We refer to the unified vision of these three systems as networks of Cooperating Objects (COs).

This new vision is more powerful and has a larger scope than each of the individual system concepts out of which it evolved. The vision of Cooperating Objects is, therefore, quite new and needs to be understood in more detail and probably extended with inputs from the relevant individual communities that compose it. Building on the success of the previous CONET workshops, CONET/UBICTEC 2013 aims at providing a forum to discuss the similarities, complementariness and advances of the areas mentioned above in order to integrate them into single coherent systems.

TOPICS OF INTEREST

Topics of interest include, but are not limited to:
- Resource management of COs
- Quality-of-Service in networks of COs
- Hardware platforms for COs
- Mobile and distributed sensing
- Hybrid cooperation of static and mobile nodes
- Communication and control of mobile COs
- Distributed control and estimation over networks
- Decentralized algorithms for control of wireless sensor networks
- Decentralized, distributed, and cooperative optimization
- Applications of control of COs
- Real-time aspects of COs
- System software for COs
- Communication support for COs
- Smart-world deployments of COs
- Applications of COs to body area networks
- COs in Complex Systems
- Security and Privacy in COs
- Enterprise Integration of COs
- Application of wireless sensor networks on Pervasive computing
- Closed-loop applications of pervasive computing
- IoT Technologies for Smart Cities

IMPORTANT DATES AND DEADLINES

Submission : January 28, 2013
Acceptance : February 28, 2013
Final version : March 28, 2013
Workshop : April 8, 2013

SUBMISSION INFORMATION

Papers submitted must contain original material that has neither been previously published nor is current under review by another conference or journal.

Full research papers (max 16 pages) as well as work-in-progress and position papers (max 4 pages) are welcome.

Submission should be formatted according to the Springer LNCS style.

Submissions can be made at:
https://www.easychair.org/conferences/?conf=conet2013

Papers will be subjected to a blind review with 3 reviews per submission. The papers accepted for presentation at the workshop will be published on http://ceur-ws.org/ and also made available to participants in electronic form, via a USB key.

We plan to organize a special issue in the Springer Series “Internet of Things: Technology, Communications and Computing” and invite selected and revised papers presented at the conference in the organized special issue.

TECHNICAL PROGRAM COMMITTEE

General Co-Chairs:
- Pedro Josè Marron, University of Duisburg-Essen
- Stamatis Karnouskos, SAP Research

TPC Co-Chairs:
- Giancarlo Fortino, University of Calabria
- Jose L. Martinez Lastra, Tampere University of Technology
- Andreas Hillig, University of Canterbury, New Zealand
- Anthony Rowe, Carnegie-Mellon University, USA
- Antonis Liotta, TüV, Netherlands
- Bhaskaran Raman, IITB, India
- Carla Scannavino, University of Cagliari, Italy
- Chompyong Lee, Washington University in Saint Louis, USA
- Daniel Wess, Edinburgh, USA
- Gabriella Carrozza, SESM, Italy
- Gianluca Dini, University of Pisa, Italy
- Jean-Dominique Decotignie, CSEM and EPFL, Switzerland
- Jean-Philippe Vasseur, Cisco Systems, USA
- Jose Ramirez-Martindale, University of Seville, Spain
- Kamin Whitehouse, Univ. of Virginia, USA
- Kay Loader, U. of Lubeck, Germany
- Koen Holtman, Philips Research, Netherlands
- Luca Motella, Swedish Institute of Computer Science, Sweden
- Marco Zuniga, University of Duisburg-Essen, Germany
- Michaela Bourouche, Trinity College Dublin, Ireland
About previous editions of the CONET Workshop: Previous editions of the CONET Workshop were held in April 2010 in Stockholm (Sweden), April 2011 in Chicago (USA) and April 2012 in Beijing (China), always co-located with CPSWeek.

For further information, please refer to: http://www.cooperatingobjects.eu/events/

This workshop is organized by the Cooperating Objects Network of Excellence, funded by the European Commission under FP7 with contract number FP7-288372-244551.

http://www.cooperating-objects.eu/ and by URBITCC, the European Research Center for Ubiquitous Technologies and Smart Cities that was founded as a result of the work performed during the CONET project.
